

2026 IEC YP Workshop

Hamburg, Germany, 16-20 November 2026

Benefits of the IEC YP Programme

Participants have a unique opportunity to:

- Join an important international networking platform
- Help shape standardization and conformity assessment work
- Share perspectives and get exposure to new ideas
- Gather insights into standardization and conformity assessment and the impact they have on technology
- Connect with peers across the IEC YP alumni network

What to expect

- Experience the IEC in action: the IEC flagship event brings together the IEC technical and management communities
- Observe high-level management and technical meetings
- Network with experts in the latest developments for electrical, electronic and ICT technologies
- Share your thoughts in interactive breakout sessions
- Meet the IEC leadership team
- Take part in a visit to an industrial site (optional)
- Step forward to be elected as a YP Leader or YP Hero and contribute directly to the IEC vision while representing the YP alumni network

Continued engagement

- Continue your involvement in the programme through a series of online sessions
- Benefit from increased opportunities to get involved in IEC work at the international and national level
- Contribute to annual projects led by the YP Leaders

Eligibility requirements

- Aged between early 20s to mid-30s
- Some experience of standard development or the use of standards in the context of conformity assessment
- Employed by a business, industry, association or government body that uses, benefits or contributes to the work of the IEC

Contact

- Contact your [IEC National Committee](#) for details about the selection process in your country
