(Draft of national standards for public comments)

Sector	06RAIL
Úkol/Project ID	28003324/0001
ICS:	45.060
Status:	REW/AMd
Označení/Reference:	CSN 28 0101
Název:	Technickobezpečnostní zkouška drážních vozidel
Title:	Technical and safety tests of track vehicles operated on mail lines, regional lines and railway sidings
Anotace/Scope	This standard determines the scope, method and conditions for carrying out technical and safety tests of vehicles operated on main lines, regional lines and industrial sidings. It is related to all powered vehicles, special vehicles and driving cars. It is further related to towed vehicles with maximum speed 160 km/h and more.

ICS:	
Status:	NEW
Označení/Reference:	CSN 730540-2
Název:	Tepelná ochrana budov - Část 2: Požadavky
Title:	Thermal protection of buildings - Part 2: Requirements
Anotace/Scope	This standard specifies thermal technical requirements for the design and verification of buildings with the required thermal and humidity conditions of the indoor environment during their use, which ensure the fulfillment of the basic requirements for buildings, in particular the fulfillment of the basic requirement for health protection according to the legal regulation and the economical fulfillment of the basic requirement for energy saving according to the legal regulation and for the purposes of assessing the energy performance of buildings. It applies to new buildings and to construction modifications, maintenance work, changes in the use of buildings and other changes to completed buildings.

Označení/Reference:	CSN 730540-4
Název:	Tepelná ochrana budov - Část 4: Výpočtové metody
Title:	Thermal protection of buildings - Part 4: Calculation methods
Anotace/Scope	This standard specifies and specifies calculation methods for the design and verification of structures and buildings in accordance with the requirements for thermal protection of buildings and energy saving for their heating, given in ČSN 73 0540-2 and in special regulations. It applies to the determination of the properties of structures and buildings used in calculations of thermal systems in buildings and other calculations for determining the energy performance of buildings.
